

## Why are natural soaps so much better for your skin?

Most commercially mass produced soaps are made from animal fat, harsh detergents and foaming agents that strip the skin of its natural oils.

Our unique natural and handcrafted soaps are made from vegetable and essential oils. The natural ingredients have been slowly hand blended at low temperatures to preserve the vital nutrients and skin care properties of the plant oil ingredients.

Our soaps cleanse and tone the skin without causing dryness.

Bath & Soul soaps and body care products are gentle on your skin and kind to the environment.
